RE: IQPP Initial Certification of the Winnipeg MB, Canada facility (NDDR #1522)

Dear Barzin Bahardoust:

We are pleased to acknowledge International Quality Plasma Program Certification of the Winnipeg MB, Canada facility. Through evaluation and third-party audit on 11/10/2022, and after review of corrective actions taken in response to findings during inspection, it has been determined that the Winnipeg MB, Canada facility meets the facility and donor criteria for IQPP Certification. The IQPP Certification period for this facility began 5/24/2022 and is effective through 5/24/2025, at which time a recertification audit will be scheduled to determine continuing compliance to the IQPP Standards.

PPTA will order a new IQPP display plaque and the center will receive this under separate cover. By following the IQPP criteria, your facility and other IQPP-certified facilities are taking a bold and progressive approach toward providing the highest quality Source Plasma and, ultimately, plasma products available anywhere in the world.

Please extend our congratulations to the staff of the Winnipeg MB, Canada facility.

Sincerely,

Diana Krueger
PPTA Manager, IQPP Audits
